

Cypress Knoll Golf & Country Club

Pitch 'n Putt Course

Please use a Tee on every hole

Maximum 6 strokes per hole

FRONT NINE (770 yds)

Hole #1: 55 yards

Stay on the cart path all the way toward the green. On the right side there is a bench under twin oak trees, where the first tee awaits you. Hit it short, and your ball will travel sharply to the left.

Hole #2: 75 yards

From the left side of the cart path, this shot appears headed toward a small elevated green. The opposite is true, as this is one of the largest greens on the course. The difficulty is in the hole placement here.

Hole #3: 120 yards

Just left of the cart path and behind a bunker, this shot could prove difficult. A high shot will plug in front of the slightly elevated green, the smallest on the course.

Hole #4: 75 yards

Find the tee halfway down on the right side of the cart path. Another elevated green could cause havoc for this shot, especially if the pin is on the upper tier. Watch out for the bunker on the right.

Hole #5: 95 yards

Find this tee on the extreme right side of the fairway, but please leave your cart on the path! This shot is almost as long as the regulation course's par 3. When the pin is on the right behind the bunker, this will be a difficult par to make.

Hole #6: 90 yards

From the left side of the cart path, this shot is the hardest on the front 9. You don't want the bunker directly in front of you to grab the ball. A chip shot to the front of the green followed by a pitch and a putt is the safe way to go.

Hole #7: 120 yards

Find this tee on the right side of the cart path near the protected wetland. A challenging shot up to the green; hit it short or right and the ball will roll down and off the green, making par difficult.

Hole #8: 65 yards

Across the fairway you will see the tee box with a deceiving shot to the green. Although it is just 65 yards, a miss left or right will net you double bogey or worse.

Hole #9: 75 yards

This is our signature hole. Leave your cart by the back of the green, and walk toward the deck where a pitch over the lake awaits you. Beware that patrons may be watching, ready to boo if you hit the water. A safer shot might be from the drop area behind the green, but the drop costs you two strokes!

BACK NINE (798 yds)

Hole #10: 115 yards

Just off the cart path on the left side, a 115 yard shot starts the back 9. Bunkers to the left and right could make an otherwise easy hole hard.

Hole #11: 75 yards

This fairway and right rough stays wet, so drive around the bend, *leave your cart on the path* and walk to the right side of the pond. A high shot might catch your ball in the trees or land it in the water. A punch shot is your best bet.

Hole #12: 95 yards

Follow the sign to #12 and you will be on "bobcat alley". The tee box is just off the cart path near the bend in front of the green. Place this shot to the right as the green slopes left to the bunkers.

Hole #13: 85 yards

Find this tee box on the hill on the right side of the fairway. A tricky shot awaits. The hardest bunker on the course is on the right, so try to stay left!

Hole #14: 60 yards

Park your cart near the green and walk back across the fairway to the tee box. An easy shot to the pin unless you pull your shot into the left side bunker.

Hole #15: 70 yards

Travel past beautiful lakes and houses to the tee box on the right, up near the green. If the pin is in the swale, a hole-in-one is possible. A back of the green pin placement makes for a difficult putt if you hit it short.

Hole #16: 95 yards

On the left side of the cart path, this shot will be easy unless the pin is behind the bunker. This hole, like no other, depends on the pin placement.

Hole #17: 90 yards

From the left side of the cart path, this shot to the big green should be an easy par.

Hole #18: 113 yards

Find the tee box on the right side of the cart path. This shot looks easy, but could make your score turn bad quickly if you miss. A good putt on a hard green is necessary; you do not want to 3-putt to end your day.
